

## Push Button Paging System

Push Button Paging solutions allow for clear, instant and direct communication between staff members throughout your healthcare facility. Wireless transmitters can be placed virtually anywhere to help speed processes, improve efficiency, and enhance patient care.

Armed with compact pagers, doctors are able to call for, and receive, prompt assistance from support staff. Push Button Paging also enhances communication between departments. For example, an optician can page a technician or receptionist when an exam is completed, and keep more patients moving through quickly. Completely wireless for maximum convenience, the system is simple to install and operate.

### Additional Features

#### Concise, Specific Messaging

Immediately direct staff to specific rooms and reduce delays.

#### Office-Wide Coverage

Wireless transmitters ensure far-reaching, reliable coverage throughout facilities.

#### Easy Installation & Operation

Pre-programmed and customizable system allows for plug-and-play installation and operation.

#### No Middleware

Direct transmitter to pager communication increases efficiency and saves money.

#### Calm, Stress-Free Environment

Instant, silent and discreet paging eliminates noisy overhead systems, enhances patient experience.

#### Individual & Group Messaging

Communicate specific requests to both individuals and assigned groups for increased efficiency.

#### Streamline Patient Flow

Immediately communicate patient status between departments for faster movement.
