Trucking, Warehouse and Forklift Systems

Increase efficiency at your distribution center with our trucking, warehouse, and forklift pagers. No need to track down drivers! Simply hand them a pager when they check in, and page them when it's time to load/unload. Pagers can notify with a flash, beep, vibration, custom message or color coded alert – great for hearing impaired workers or noisy areas. Improve productivity even more by paging forklift operators to the loading dock at the same time the truck arrives.

- **Clear Text Messaging** - Send customizable messages to waiting drivers to route them to the right areas
- **Improved Productivity** - Keeps everyone informed, increases shipping/receiving productivity, and creates a more efficient routing process
- **Anti-Theft Features** - Minimize pager loss with an out-of-range alert
- **UHF Signal Technology** - Guarantees range, even in the largest distribution centers
- **Smarter Charging** - Dramatically extends the life of pager batteries without overcharging them (batteries made to easily remove and replace)
- **Unique System ID** - Eliminates interference from other paging systems

SmartCall Alert
Customized background colors and alphanumeric text messages deliver the most effective, long-range notification system for hearing impaired, noisy and hands-free environments.

StaffCall IQ Pager
Inform staff by sending detailed text messages with up to 7 lines of text. Save time by automating communications with up to 10 preprogrammable text or image alerts.

Extreme Coaster Pager
Reliable, durable, water resistant, and FCC Licensed Coaster pagers that come with extreme warranty - we will repair or replace any inoperable pagers for two years from the date of purchase.

Push Buttons
Quickly alert drivers, managers, warehouse personnel and more with push buttons that alert a pager – your choice of 1 or 3 buttons.

Numeric or Alpha-Numeric Pagers
Choose from either battery-operated pager, both clipping to your clothing for quick and easy messaging, one with a top view and one with a regular view.

Two-Way Radios
Motorola or JTECH Extend Two-Way radios are a cost-effective way to quickly notify managers, drivers, and staff for maximum warehouse efficiency.

Virtual Service Kiosk
QR Code Staff Notification System with up to 5 customizable virtual push buttons. Simply scan the QR Code and choose an option from the display of buttons, which will redirect to a web page or notify a pager immediately. VSK can also be combined with our best-selling SmartCall Alert Pagers to page the right person to the right place, minimizing downtime.

JTECH®
